

Does your world look like this?

OR LIKE THIS?

**SIMULATOR
SICKNESS**

**TUNNEL
VISION**

With the Sensics family of **panoramic head-mounted displays**, you get:

- A fully-immersive experience
- Full use of your peripheral vision
- A compelling sense of stereo, mass and space
- Unmatched realism and situational awareness
- Millions of full-color pixels per eye

SENSICS

The **Sensics piSight™** products are the world's most immersive head-mounted displays. Sensics products are used by demanding organizations worldwide in numerous applications including training, virtual prototyping, remote presence and more.

The piSight offers:

- Panoramic field of view that delivers full 3D immersion: from 82° to 180° diagonal, depending on model
- An upgradeable design that fits a very wide range of performance and budget requirements
- High resolution: Up to 4200x2400 pixels per eye
- Balance and comfort

Sensics head-mounted displays are a critical part of a realistic, immersive virtual reality experience.

It's sensational... It's Sensics.
